

FJ Dynamics Global expands distribution to United States / Canada

(January 21, 2022) FJ Dynamics A global leader in robotics and autonomous technology, announced today that it has continued its global expansion to US and Canada with a partnership with Deep Sand Technology LLC (DST), which is a collaboration with Rancho Nexo and VRO Consultoria Empresarial. DST will expand FJ Dynamics dealer network in United States / Canada. The agreement between FJ Dynamics Global and DST highlights the emergence of latest brands with advanced product development. FJ Dynamics Global is developing technology to meet the needs of today's farmers at price points that make it accessible to all farmers.

"FJDynamics Global technology can be added to existing equipment platforms such as sprayers, harvester, tractors and transplanter for immediate precision RTK operation at an affordable price and upgradable to autonomous operation with advanced AI (Artificial Intelligence) and infrared technology for autonomous operation 24/7" says Nancy Zhu, Sales Director for FJDynamics Global. Nancy also states Deep Sands tech in collaboration with Rancho Nexo and VRO Consultoria Empresarial bring FJ Dynamics Global over 50 years of combined experience in the US and Canada agricultural markets.

"Starting as one of the first customers of FJD in the US in 2021, I was impressed by quality and accuracy of the FJD system that is also offered at an affordable price. I knew then I wanted to help other farmers find out about FJD's Autosteer systems that work great with new or older equipment. This is just the start of what FJD can bring to the US and look forward collaborating with them" says Joey Koebelen a farmer and founder of Deep Sand Technology.

"We are thrilled to be working with FJ Dynamics Global" says Matt Grant, Founder/Owner of Rancho Nexo. FJ Dynamics has an offering that makes precision agricultural more accessible. We are excited to collaborate with US and Canadian farmers to incorporate this technology into their management practices.

"FJD has high precision technology that is affordable to all farmers around the world. FJD already has complete autonomous farm operations running for tractors, harvesters, spraying and transplanting in rice production in Asia and plan to expand this autonomous technology to farming in the western world in 2022" says Jeff Rohlena Founder/Owner of VRO Consultoria Empresarial. Rohlena goes on to say that "Having autonomous technology that can work on existing farm equipment at an affordable price will allow a farmer to utilize autonomy without having to replace existing combines, sprayers, tractors, with new costly power platforms."

FJ Dynamics products will be introduced to the US market at the Iowa Power Farming Show in Des Moines, Iowa February 1-3, 2022, Booth 2406 (Sprayer Specialties Inc) and at the National Farm Machinery Show in Louisville, Kentucky February 16-19, 2022, booth 8859 (Sprayer Specialties Inc)

About FJ Dynamics Global

FJDynamics is a global robotics company focusing on AI, advanced manufacturing, and big data. We aim at providing a full range of autonomous and digital solutions for the industrial automation and the intelligence of agriculture, forestry, animal husbandry, fishery, and construction. FJDynamics is committed to promoting the upgrade of traditional industries to digitalization and intelligence to achieve efficiency improvement and cost reduction.
